Tan Gim Tuan GT envisions Kampung Tunku (N35) as a model livable city with green corridors and balanced development. In order to accomplish this vision here is what is needed.

HEALTHY CITY

Having an effective representation that constantly ensures the cleanliness and livability of every part of our city.

FREEDOM OF MOVEMENT

Be it for pedestrians, the disabled, bicycles or vehicles, Kampung Tunku must allow its residents the freedom to move as they choose without difficulty.

RESILIENT INFRASTRUCTURE

Kampung Tunku should be free from flash floods, little to no water cuts and power interruptions with excellent basic infrastructure.

ROOM TO LIVE

Living space is a commodity that needs to be evenly balanced amongst people, nature and development.

CARING LOVING COMMUNITY

Creating a community that can empathize and respect each other's needs and wants.
